Tools for the toughest demands

Powerful and versatile. Like your work. KHC 18 cordless combi hammer

Powerful with 2.6 joules of impact energy.

Achieve your objective effortlessly: Brushless EC-TEC motor and pneumatic hammer mechanism ensure fast work progress when drilling and chiselling in concrete, stone and masonry. The combination of 2.6 joules of impact energy, vibration damper and ergonomic handle supports you in demanding applications.

All-rounder with chisel function.

Versatile applications, just as you need them: Hammer drills, drill bits and chisels are picked up with the SDS-Plus chuck. And for drilling and screwdriving without impact in wood and metal, you can switch to the keyless chuck in seconds.

Low dust with a clever system.

Because clean working is healthier: The sophisticated dust extraction device (see right side) fits every one of your applications and fits into the clever Festool extraction system. Simply connect it to the extractor and work with low dust. And for extra convenience, switch the mobile dust extractor on and off via the Bluetooth® battery pack or the remote control.

* The Bluetooth® function is not available in every country. Please contact your local dealer for further information.

Low-dust drilling and chiselling. AV-BHC/KHC dust extraction device

Breathe deeply when hammer drilling and chiselling:
The compatible dust extraction device fits all Festool hammer drills and combi hammers, fits into the extraction system and adjusts optimally to your drilling length. Simple handling, such as fixing to the depth stop and other sophisticated details, make the dust extraction device the ideal companion for your next use.

Well stowed away and charged in a flash: Two 8.0 Ah Li-HighPower battery packs. An SCA 16 AIRSTREAM rapid charger. In a Systainer³.

Two mega-strength battery packs. The fastest charger. In one Systainer.

The 8.0 Ah Li-HighPower battery packs provide maximum runtime and maximum power and, thanks to the Li-HighPower cell technology, last 60% longer than a standard 5.0 Ah battery pack. The SCA 16 rapid charger recharges them in a flash with an intelligent AIRSTREAM cooling function even after heavy-duty applications.

Minimal charging time, maximum runtime: With the SCA 16 AIRSTREAM rapid charger, the extremely powerful Li-HighPower 8.0 ASI battery pack can also be charged in a flash.

The AIRSTREAM technology of the SCA 16 rapid charger actively cools the battery pack before and during the charging process. So a real powerhouse like the 8.0 Ah battery pack with Li-HighPower cell technology is also fully charged again and ready for use extremely quickly – for maximum runtime and maximum power.

The heroes amongst compact screwdrivers. With powerful 18V. And compact 12V. CXS/TXS 18 and CXS/TXS 12 cordless compact screwdrivers

Light, compact and impressively strong. The CXS/TXS 18V and 12V compact screwdrivers are your ideal helpers for a wide range of everyday tasks. A number of attachments find solutions for the most difficult applications – perfect also for narrow spaces or corners. The FastFix interface and the CENTROTEC system ensure fast tool changes. Clever details such as the bit holder, light control and lid compartment Systainer³ make the new compact screwdrivers multi-talents with practical special equipment. Available in C shape and T shape – whatever works for you.

CXS 18

TXS 18

CXS 12

TXS 12

Super compact. Surprisingly powerful.

The 18V and 12V CXS/TXS will impress you with their combination of a small, light design and full power. These compact screwdrivers bring their qualities as practical, powerful companions to the fore every day in virtually all applications.

Brilliantly good details.

The 18V and 12V CXS/TXS are optimally equipped. With a bit holder, LED light control, a belt clip and the lid compartment Systainer³ (depending on the version), they leave nothing to be desired and make your work easier. The CXS/TXS 12 cordless compact screwdriver comes with a compact battery pack that is compatible with all chargers from the 18V battery range.

A number of attachments for every application.

Flexible screwdriving and drilling: The right attachment for your application. All attachments of the current 18V screwdrivers from Festool fit perfectly – with quick and easy tool change through the CENTROTEC system and FastFix interface.

CORDLESS POWER YOU NEED.

QUALITY YOU LOVE.

18 VOLTS – INSPIRED BY CRAFTSPEOPLE.

18V 

FESTOOL

The perfect combination of cordless tools and accessories in one set.

Cordless combo sets*: Sawing, universal, timber construction and installation

More 18V tools at once: Available in four versions, these sets are designed for a wide variety of applications to match your needs.

With the free ToolBox, you get a practical toolbox in the Systainer format. This allows you to transport your tool safely and conveniently from the workshop to the next point of use.

Sawing cordless combo set

TSC 55 K cordless plunge-cut saw, PSC 420 cordless jigsaw, and the free ToolBox TB M 137 and matching system accessories

Timber construction cordless combo set

HKC 55 cordless circular saw, TPC 18/4 cordless percussion drill, AGC 18 cordless angle grinder and the free ToolBox TB M 137 and matching system accessories

Universal cordless combo set

TSC 55 K cordless plunge-cut saw, TXS 18 cordless drill, and the free ToolBox TB M 137 and matching system accessories

Installation cordless combo set

TID 18 cordless impact screwdriver, TXS 18 cordless drill, PSC 420 cordless jigsaw and the free ToolBox TB M 137 and matching system accessories

*The Cordless Combo Sets are not available in every country. Please contact your local dealer for further information. The figures may be different from the actual items included. Please take note of the product description in each case.

An extra power boost for your arms. Work effortlessly, even overhead. ExoActive exoskeleton*

The ExoActive exoskeleton now makes light work even of strenuous overhead tasks. Whether dry mortarless construction, painting, wallpapering or installation, whether on walls or ceilings, the ExoActive gives you an extra power boost when your arms get tired, and takes the load off your neck.

For you, less physical exertion means:

Greater efficiency, greater focus on the quality of your work and greater enjoyment of your work. You can regulate the required power on the exoskeleton in a matter of seconds so you get targeted support precisely where it's needed. The ExoActive is lightweight and easy to wear, just like a rucksack, and can also be adjusted quickly to your individual height.

* The ExoActive Exoskeleton is not available in every country. Please contact your local dealer for further information.

Makes it easy for you.

The ExoActive exoskeleton supports you under your arms to take the effort out of working on walls or ceilings. The active system with its powerful 18V battery provides an extra power boost to give you the exact support you need during tiring overhead work.

Targeted support.

Whether from the waist up, at chest height or overhead, you can set where you would like support and the level in a matter of seconds. This way, the ExoActive gives you targeted support precisely where it's needed.

**Fits like a glove.**

As easy to put on as a rucksack, it can be quickly adapted individually to your height and its ergonomics are perfectly tailored to you. Once you've worked with it, you won't ever want to work on a wall or ceiling without the ExoActive again.

The all-rounder for sanding work on walls and ceilings. PLANEX LHS 2-M long-reach sander

The PLANEX M is the all-rounder of our long-reach sanders. Simply unpack it from the transport bag, switch it on and get to work. Its eccentric sanding motion achieves a high surface quality on walls and ceilings. The adjustable suction power means that you can sand on walls and ceilings without tiring – reducing the strain on your arms and back. Its working length of 1.4 m is ideal for all standard room heights. What's more, the practical T-shaped handle even provides additional reach.

Eccentric motion for a perfect surface finish.

Its eccentric sanding motion achieves a high surface quality with no grooves.

Minimal effort during sanding.

The adjustable suction power means that the PLANEX holds its own weight against the wall and ceiling – reducing the strain on your arms and back during all sanding tasks.

Easy handling.

Simply unpack the sander from the transport bag, switch it on and get to work – the PLANEX is ready to use immediately.

Splinter-free sawing like never before. Perfect from the very first cut. TSV 60 K plunge-cut saw with scoring function

Splinter-free in a single cut.

With the TSV 60 K, the dream is now a reality. The built-in scorer can be adjusted with precision and, together with the scoring saw blade, it guarantees consistently splinter-free cuts on both sides. Which means perfect sawing results from the very first cut!

Protects against dangerous kickbacks.

The innovative KickbackStop in the plunge-cut saw with scoring function protects your workpiece and minimises the risk of injury. The saw detects a kickback in the blink of an eye and stops the motor within a fraction of a second.

Sawing system for perfect panel cutting.

Whether it's on the construction site or in the workshop, even large panels can be cut with precision. Thanks to the Festool system accessories, it cuts just as well as the stationary machine: You can work precisely even while on the move, and can enjoy splinter-free results to suit your needs.

Your specialist. Perfectly splinter-free cuts in coated chipboards.

WOOD FINE CUT SPECIAL scoring saw blade

The diamond scoring saw blade scores the top layer of the material, ensuring a splinter-free cut on both sides. Perfectly tailored to coated or veneered chipboards. Two diamond teeth enable splinter-free cuts, even in hard-to-machine materials.

What is the difference to the UNIVERSAL scoring saw blade?

With the all-rounder with a diamond tooth, you will manage splinter-free cuts in coated boards and HPL compact panels (e.g. Trespa®).

- > Extremely long service life thanks to the use of diamond cutting teeth
- > The conical tooth shape makes it easy to adjust the scoring width to the saw cut
- > Splinter-free cuts, especially with veneered and coated chipboards

Guides you to the perfect result right from the start.

FS 1400/KP guide rail set

Perfect guidance variety in one bag:

The set allows you to make straight and precise cuts for almost all your applications, for horizontal work on floors or work surfaces, as well as for applications on walls. Using the self-aligning connecting piece, you can connect both rails for long, straight cuts with no deviations.

Expertly handles every corner with you.

SYMMETRIC SYMC 70 cordless compound mitre saw

One corner, one setting.

Saw exactly along the bisector without making calculations: The symmetrical stop system enables you to effortlessly saw strips for interior and exterior angles with just one setting.

Technically engineered for all of your needs.

The simple operating concept, the LED spotlight and the improved extraction optimise the work process for you. This allows you to concentrate fully on your strips.

As agile as you require.

The rollers allow you to quickly and easily align the saw with yourself and the strips. This means that you can work with maximum efficiency even in small spaces.

Really strong. Really fast. For your most powerful sawing applications. RSC 18 cordless reciprocating saw

Full speed ahead!

The powerful brushless EC-TEC motor and the switch-activated pendulum stroke ensure high-speed working. The RSC 18 reciprocating saw can be smoothly guided and has an extremely low level of vibrations. As a result, its full power is directed into its saw blade and does not go into the machine or your arms.

Extremely robust.

Quality you can rely on – made for the toughest day-to-day applications at construction sites. The brushless EC-TEC motor is synonymous with a long service life. Its low level of vibrations protects all of the RSC 18's parts. This means you are optimally equipped even for the most powerful saw applications.

We've thought of everything.

Whatever you have planned, we have the right saw blade for you. The special chuck enables you to change the saw blade quickly and without contact, which keeps your fingers off the hot blade. You can neatly stow away the machine and all the accessories, e.g. the dust extraction device, in your Systainer, so that everything is quickly at hand.

Lights on for maximum precision. OF 1010 R router

The OF 1010 R router enables you to work with maximum precision. The column clamping on both sides makes it extremely torsion-resistant, and the parallel side fence can be set exactly and without tools. The easily accessible working area with LED light ring offers the best view of the workpiece. This is found directly on the workpiece and provides shadow-free lighting.

Best view plus light.

Thanks to a clearly visible working area, you have a clear view of the router and scribe mark. The LED light ring provides shadow-free lighting from all sides in two brightness levels. It is directly integrated into the base plate and is therefore close to the workpiece. You can therefore always see exactly where the router is cutting.

Maximum precision for your work.

The column clamp on both sides makes the router extremely torsionally rigid and the routing depth can be set to an accuracy of 1/10mm in a matter of seconds. The parallel side fence is robust and, thanks to the fine adjuster, can be precisely adjusted – all without any additional tools. Everything you need for a precise routing result.

One Systainer. Countless possibilities.

ZS-OF 1010 M accessories Systainer

You will find many aids for your application in the practical Systainer³: Guide rail adapters, copying rings, base runners and much more. Everything tidily stowed and always at hand. Your routers are also best protected with additional spaces.

Guided in parallel for the best result.

SA-OF 1010/MFK parallel side fence

Set quickly and precisely:

Thanks to the central clamp and guidance jaws that can be set without tools, the parallel side fence is ready for use in next to no time. The fine adjuster, precise to the millimetre, offers maximum precision when routing. And it gets clean at the same time – thanks to the optional extraction adapter.

Suitable for the
OF 1010 REBQ* router and
MFK 700 module edge router.

* From production month 2021-09

Versatile accessories with even more uses.

Its wide variety of accessories, such as routers, routing templates, guide rails and the jointing system VS 600 means that the possible applications of the OF 1010 R are virtually unlimited.

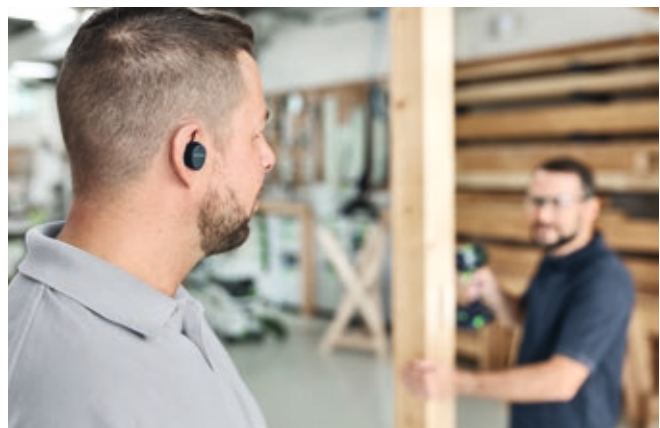

The specialist for extensive cleaning work.

CT 25 mobile dust extractor

Ideal for cleaning where there are large volumes of dust and dirt at construction sites, in workshops and offices: With a 25 l container volume, the CLEANTEC CT 25 extracts dust, dirt and water. Its design ensures that the full container volume can be used – for long periods of work without having to change the filter bag.

For good conversation. In safety. The ear protection for professionals. GHS 25 I ear protection*

Protects your ears.

With our multifunctional ear protection, you can listen to music or make phone calls – while at the same time relying on the advantages of professional ear protection: The GHS 25 I meets the requirements of the EU standard EN352.

Allows speech through. Blocks noise.

You can hear ambient noises such as speech within a safe listening volume (up to 79 dB). So you don't have to take off your ear protection to talk to your colleagues.

Clear communication.

When making phone calls, the built-in microphone suppresses disruptive background noise so effectively that the person on the other end of the line can understand you clearly.

* The GHS 25 I ear protection is not available in every country. Please contact your local dealer for further information.

GRANAT – the perfect choice for sanding. For flawless surfaces. GRANAT D150 abrasives starter set, GRANAT Systainer*

The abrasives Systainer comes in the following versions: D150, D125, 80x133, Delta and D90/V93.

The perfect introduction to the world of GRANAT.

The GRANAT abrasives Systainer and GRANAT D150 starter set offer the perfect introduction to the world of GRANAT abrasives. With their wide selection of different grit sizes, the sets make a perfect addition to your sander. And in doing so, they offer premium quality for coarse and fine sanding. The GRANAT D150 starter set contains six packs of 10 each in grits P60, P80, P120, P180, P220 and P320.

* The GRANAT Sets and Systainers are not available in every country. Please contact your local dealer for further information.

The tool bag in Systainer format. Systainer³ ToolBag

Fits perfectly in the Systainer system.

The ToolBag can be coupled with all Systainer generations and mobile dust extractors, and is compatible with many more system accessories – for better organisation and time savings at the workplace.

Hand tools tidily stored.

Hand tools and accessories are stored in a clearly organised way and transported in the many practical compartments of the ToolBag. The robust inner pockets can be individually placed, allowing totally individual mounting.

A tidy storage system.

Smart solutions for storage and transport

The Festool Systainers have been designed for safely storing and transporting high-quality power tools and accessories. Festool has been setting standards when it comes to functionality with the Systainer storage system since 1993. And now, more new products are here to complement the system: In the Mini Systainer³ S, your small parts and accessories are stored neatly and clearly organised.

With the Systainer³ Rack, you can also store six Systainer³ S 76 just like in a shelf and even transport them in the bott vario3 vehicle equipment. And in the Sortainer³ drawer Systainer or the Systainer³ Combi, you have everything you need, clearly organised in one place.

First-aid kit

Wago terminal set

Forstner drill bit set

Clever & convenient:

The equipped accessories sets in the MINI-Systainer³ offer you an incredibly broad range of applications: There is something for everyone, from drill bit sets to dowels and Wago terminals through to first-aid kits.

Auger bit set

Oscillator saw blade set

Bit and drill set

Dowel set

Making small Systainers even more mobile: The Rack system.

You can store up to six MINI-Systainer³ S 76 in the Systainer³ Rack in a neat and clearly organised manner. As a result, even your small Systainers fit into the complete Systainer system and can be transported together or built into a shelf system.

Accessories always in reach. The drawer Systainer. Sortainer³

Simply practical:

In the Sortainer³, you have all accessories, small parts and tools clearly organised and at your fingertips. Thanks to the practical front drawers, the content is also accessible at all times in a SYSTAINER tower.

Systainer at the top. Sortainer at the bottom. Systainer³ Combi

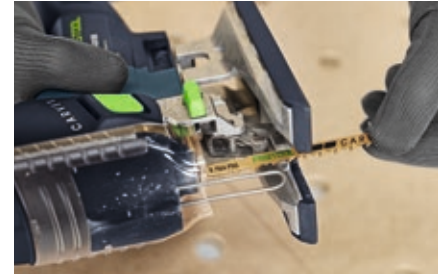

Everything in one place:

In the Systainer³ Combi, you can transport machinery and accessories together in one place. In the Systainer at the top, you have space for power tools and hand tools; in the drawer below, you can tidily stow the right accessory.

The jigsaw blade sets for your jigsaw. STS-Sort/21 W/P/M and STS-Sort/21 P/M/B

The jigsaw blade set for wood, metal and plastic consists of five different jigsaw blades for outstanding results when working with wood materials, plastic and metal, and is consequently the perfect all-rounder for a multitude of your applications.

STS-Sort/21 W/P/M For wood, plastic and metal

The jigsaw blade set for plastic, metal and building materials consists of four different jigsaw blades for outstanding results when working with plastic, metal, building materials and abrasive materials, and is consequently perfectly suited to your most demanding applications.

STS-Sort/21 P/M/B For plastic, metal and building materials

The saw blades for your oscillator. MSB 40/32/HM/OSC, MSB 60/32/HM/OSC, SSM 70/OSC/3, OSC-Sort/5

MSB 40/32/HM/OSC and MSB 60/32/HM/OSC metal saw blades

The metal saw blade with an additional ceramic coating boasts incredibly high wear resistance and a wide range of applications. It is perfect for sawing hard materials such as ferrous metals, stainless steel or copper pipes. It is also suitable for abrasive materials such as façade panels or brick.

SSM 70/OSC/3 silicone blade

The round multi-tool silicone blade for easily removing silicone, acrylic and soft putty materials from joints.

OSC-Sort/5 OSC saw blade set

The OSC saw blade set comprises five different blades for sawing a wide variety of materials, such as wood, composites, plastics, ferrous metals and abrasive materials, and removing strongly adhering coatings.

FESTOOL ACCESSORIES.

TAKE YOU FURTHER.

INSPIRED BY CRAFTSPEOPLE.

FESTOOL

Expand your range of applications and find precisely the accessory you're looking for.

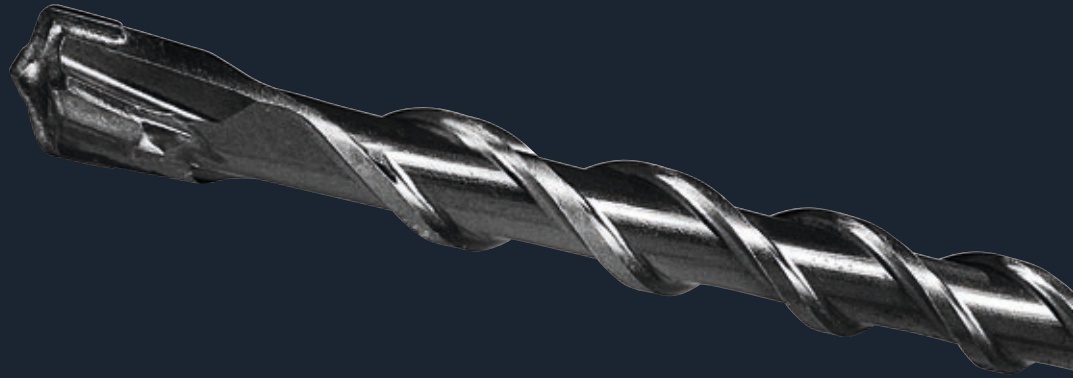

With our accessories, you reliably get another step closer to the best result you can achieve. Now discover diverse solutions that satisfy your requirements and optimally support you in every application.

Completely tailored to our machines and your needs, our accessory allows you an optimal work process – efficiently and without rework.
